# About Abu Dhabi Food Hub - KEZAD

---

**Discover the region's finest wholesale food trading and logistics platform, developed in collaboration with Rungis - the world's #1 food market**

Strategically located between Dubai and Abu Dhabi in the UAE, the Abu Dhabi Food Hub - KEZAD is a one-stop-shop, wholesale trading and logistics hub for food commodities. The Hub is being developed in joint venture between Abu Dhabi Ports Group and Ghassan Aboud Group.

The 3.3 sq km Abu Dhabi Food Hub - KEZAD is being developed as an integral part of UAE's food security strategy.

With the Food Hub, we aim to position UAE as an essential node in global food supply chains, with the development anticipated to bring forth significant enhancements in the way food commodities are traded and distributed.

Abu Dhabi Food Hub - KEZAD will also drive digital trade through a robust first-of-its-kind platform that enables ecommerce and inbound-outbound trading formalities, all on a single-window digital platform.

It is an ambitious venture to enhance diversity and modernize food trade in the UAE and the region.

**The 3.3 sq km market is planned and being developed to enhance diversity and modernize food trade in the UAE and the region.**

The development will be spread across a total of 3.3 sq km comprising various facilities such as trading pavilions, complementary activity zones, logistics facilities, open markets, retail, F&B zones and areas for government and commercial services.

We envision the market as a vibrant centre for food trade offering all products and services under a single ecosystem, a market that brings together global sellers and buyers. With the region being a net importer of food that endures long supply chains, Abu Dhabi Food Hub - KEZAD will be a fully enclosed market to suit the local climatic conditions and enhance the quality of products offered to the consumers by maintaining integrity of cold chain.

# The perfect location for the food trade in the region

Strategically located in KEZAD and adjacent to 311 and E11, the development offers access to key source and consumption markets through multimodal connectivity by sea, land, and air.
